

Serious About Soybeans

Not all soybeans are created equal.

Raw genetic potential is what drives yield, and growers who start with the best genetics maximize profitability. **DONMARIO®** products are proven to **consistently maximize yield**, no matter which trait platform you choose.

Transforming Soybean Genetics.

DONMARIO® brings **world-class genetics** to progressive soybean growers in the United States. **Leading global soybean brand DONMARIO®** is now available in your region, **exclusively from IOM Grain.**

We work toward delivering results better than anyone, anywhere.

Proven. Across the globe. And down the road.

Internationally, **DONMARIO®** is known for elite soybean breeding and research capabilities. We bring more than four decades of industry-shaping leadership and proven success, from South America to South Africa. In fact, **DONMARIO®** is a top brand in five of the six largest soybean-producing countries.

Since we launched our U.S. soybean breeding program in 2007, we have steadily improved and increased research efforts in both scope and scale year after year. This focused and sustained breeding delivers elite soybean genetics specifically developed in the U.S., for the U.S.

DONMARIO® by the numbers:

Numbers tell the story:

DONMARIO® has proven success where soybeans matter most. We are one of the most recognized names in South America, and our sister brands are a significant force in Europe. The genetic foundation behind **DONMARIO®** is one of the most dominant in the main soybean growing areas of the world, accounting for one in two of global soybean acres.

40+ YEARS

More than four decades of soybean innovation

6 COUNTRIES

DONMARIO® is a leading global brand in six of the top soybean-producing countries

4

U.S. breeding stations

140+

U.S. testing locations

115,000

New U.S. varieties tested annually

400,000+

U.S. research plots

The DONMARIO® path to higher yielding soybeans.

1

Start with the best genetics.

2

Create the highest quality seed.

3

Protect yield by delivering the most advanced traits.

4

Optimize production with intelligent agronomics.
